

ROBERTO PACI DALÒ / YE SHANGHAI TECHNICAL RIDER

Video:

- 1 DLP Video projector with power related to the size of the venue. We suggest 10,000 AnsiLumen but this depends on the venue.
- 1 Computer as video player.
- 1 White wall or projection screen.

P.A.:

The PA-size obviously depends on venue size and layout, however a sufficient well maintained PA should be supplied to give good, clear, full range reproduction to all audience areas. It should be a professional 4 way active system capable of producing 110 dbA at FOH position and consist of no less than 1500 W per 100 audience members.

The artist sends a stereo signal to the main board from the stage using a MOTU Ultralight audio card. Signals are 1/4" balanced jacks and DI Boxes are required.

Acoustical instruments (bass clarinet / clarinet) go directly into the artist's audio card and are processed before they're sent to the main mixing board.

Monitor:

- 2 stereo wedges of good quality (15"/2") connected via BUS1&2 to the mixing board.
- Monitors should be placed on the sides of the table.

Mixer, Power, etc:

- 1 Mixing Desk Mackie ProFX8 or ProFX12 ON STAGE.
- 1 Shure S58 Mic on stand.
- 2 DI Boxes.

People:

A system technician familiar with the rigging, cabling, and operation of the entire system should be from load in until the end of the show.

1 sound engineer during setting-up, show, and strike.

1 video person during setting-up, show, and strike.

The organization should send to the artist the head technician's direct contact (email / mobile number) as soon as the performance is agreed and scheduled.

Timing:

The artist requires three hours for setting-up video and sound checks.

Please make sure everything is available at the venue by the time of sound & video check!

The technical rider is part of the show, please check professional gear of good quality.

Various:

1 Table (150 x 80 cm, 100 cm height)

6 x 220 V / 16 A

Green Room, Water, Vegetarian Sandwiches, Fruits, Green Tea
